Overview

This notebook provides comprehensive quality checks for the GBIF occurrence data, validating readiness for **spatial**, **temporal**, and **taxonomic** gap analysis.

Run this after: Scripts 01-06 (ingestion + derived summaries)

Purpose:

1. Verify all required files exist and are properly formatted
2. Identify data quality issues before gap analysis
3. Characterize spatial, temporal, and taxonomic coverage
4. Flag potential biases that may affect gap interpretation

Last run: 2026-02-11 08:45:00.400518

6.4 Overall Readiness Score

```
## ## Overall Gap Analysis Readiness

## **Checks passed:** 17 / 17 ( 100 %)

##  **READY** for comprehensive gap analysis
```

7. Recommendations

```
## Based on this sanity check, consider the following:
##
## - Consider spatial bias correction due to high sampling inequality
## - 108 years have no data - may affect trend analysis
## - ~135,874 Backbone taxa may be missing from GBIF - run taxonomy matching
```
